Skills

Languages: C++, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Shadcn/UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Postman, Vercel

Core CS: Data Structures & Algorithms, OOP, DBMS, MVC Architecture

Experience

FullStack Developer

April 2023 – Nov 2025

Freelancing (Remote)

- Developed and deployed custom web applications for clients using the MERN stack, **REST APIs**, and Tailwind CSS, focusing on clean architecture, maintainable code, and improved digital workflows for end users.
- Built fully **responsive user interfaces**, implemented secure **authentication** and **authorization** mechanisms, and integrated frontend components with backend services to ensure a seamless and consistent user experience across devices.
- Optimized database queries, API response handling, and application performance through efficient data modeling, **reducing page load times by up to 40%** and improving overall system reliability.

Projects

Doctor Appointment Booking Platform [GitHub](#)

Apr 2025 – Nov 2025

- Designed and developed a centralized web application to streamline doctor **appointment booking, enabling users to search, filter, and schedule appointments** based on specialization and availability.
- Designed using the MERN stack with secure APIs, **analytics dashboard**, and responsive UI, ensuring seamless accessibility, **performance**, and **device compatibility** across different platforms..
- Improved healthcare accessibility by **reducing appointment delays by 88%** and minimizing manual scheduling efforts, helping patients connect with doctors faster and improving overall service efficiency.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js

Accident Analytics Platform [GitHub](#)

March 2024 – Jul 2024

- Built a web app to solve the problem of delayed accident reporting and lack of **centralized road safety monitoring**, with **admin** controls for managing, verifying, and tracking real-time accident reports efficiently.
- Designed using the MERN stack with secure APIs, **analytics dashboard**, and responsive UI, ensuring seamless accessibility, performance, and device compatibility across different platforms.
- Enhanced community safety by **reducing manual reporting effort by 65%** and improving accuracy of accident insights, helping authorities respond faster, make informed decisions, and save lives.
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js

Awards & Certifications

- **Secured Global Rank 3025 – LeetCode Weekly Contest 481 (May 2025):** Ranked among 32,000+ participants worldwide, demonstrating strong problem-solving and algorithmic skills.
- **Top 8 Rank – Inter-College Hackathon:** Achieved 8th position among multiple teams by developing an innovative solution under time constraints and collaborative teamwork.

Education

Bachelor of Technology - Computer Science and Engineering

Aug 2022 – Present

Lovely Professional University, Jalandhar, Punjab

CGPA: 7.83 / 10

Intermediate

Jul 2018 – Aug 2020

New Horizon Public School, Bhagalpur, Bihar

Percentage: 70.6%

Matriculation

Apr 2017 – Apr 2018

D.A.V Public School, Mathurapur, Bihar

Percentage: 85.6%
